Gerber Technology Redefines Mass Production with Launch of Revolutionary, Next-Generation Cutting Room

The Gerber Atria™ Digital Cutter sets a new digital standard for mass production.

New York, New York, USA, October 22, 2020 - Gerber Technology is revolutionizing the flexible materials processing industry with the launch of their end-to-end solution for mass production, which will be unveiled at their annual technology conference, [ideation](#), on November 4-6. The connected platform features the new [Atria digital cutting solution](#) and the October 2020 release of AccuMark® 2D and 3D, AccuNest™ and AccuPlan™. With decades of industry experience, a rich history of innovation and feedback from its global customer base, Gerber developed a next-generation, digital mass production solution that will offer the best throughput, quality and price per piece in the market.

The Atria digital cutting room leverages Industry 4.0 and IoT to seamlessly integrate with Gerber's pattern design, cut planning and nesting solutions, which connects the entire mass production process from CAD to the cut room. Gerber's latest product releases deliver what manufacturers need to succeed in the post-COVID world by integrating data management, improving efficiencies, reducing material waste, optimizing nesting and cutting production costs.

"We designed the Atria to be the most intelligent, integrated, and high-performance cutter the mass production market has ever seen," said Lenny Marano, Chief Commercial Officer at Gerber Technology. "The new normal COVID era is a challenge for many manufacturers and requires them to be agile and innovative. The Atria is backed by Gerber's end-to-end solution that will allow companies to easily adapt and respond to consumer demands and market challenges."

The Atria digital cutting room builds on the innovative spirit of Joseph Gerber, the company's founder and the pioneer behind the first automated cutting solution. As the industry's smartest machine to date, the Atria promises to transform mass production by

improving overall throughput by 50%, reducing consumable usage by over 30% and improving material yield by 5% with zero buffer cutting in many applications at full speed. The intuitive solution will be a gamechanger for the workwear, denim, furniture, transportation and personal protective equipment (PPE) markets as it utilizes powerful algorithms to eliminate errors, reduces costs and ensure data integrity at every point in the process.

The Atria has already received high praise from early adopters who have been testing and leveraging the advanced cutting room solutions for several months. GDI Grupo Diamante Internacional, manufacturer of professional uniforms, emphasized the Atria's ability to cut even the toughest materials. The company has been able to cut 30% more material since implementing the Atria into their workflow . Apparel manufacturer, Lesato, has also seen a major improvement in cut quality. The Atria has allowed them to significantly increase their ply height while cutting faster and with absolute precision.

“Fashion and transportation industries were two of the industry segments most impacted by COVID-19, which meant manufacturers in these industries had to quickly adapt their processes, accelerate eCommerce and look for new ways to connect with customers and maintain a competitive edge,” said Ron Ellis, Director of Hardware Product Management at Gerber Technology. “The Atria's state-of-the-art control technology and intelligent sensors enable versatility and make it the perfect solution for a variety of markets including apparel, transportation and furniture”

For more information on the Gerber Atria Digital Cutter, please watch [this interview](#) with Leonard Marano and Ron Ellis.

About Gerber Technology

Gerber Technology delivers industry-leading software and automation solutions that help apparel and industrial customers improve their manufacturing and design processes and more effectively manage and connect the supply chain, from product development and production to retail and the end customer. With customers in 134 countries, Gerber Technology has a global team of passionate experts to support companies in apparel and accessories, personal protective equipment, home and leisure, transportation, packaging and sign and graphics industries.

Based in Connecticut in the USA, Gerber Technology is owned by AIP, a New York-based, global private equity firm specializing in the technology sector and has more than \$3.0 billion assets under management. The company develops and manufactures

its products from various locations in the United States and Canada and has additional manufacturing capabilities in China.
