

SHIMA SEIKI to Participate in CISMA 2019

Leading textile machine manufacturer SHIMA SEIKI MFG., LTD. of Wakayama, Japan will exhibit at the China International Sewing Machinery and Accessories Show (CISMA 2019) in Shanghai this month.

On display at the SHIMA SEIKI booth (Hall E2, Stand F12) will be "Shima Cutting Solutions," a fully integrated cutting system that offers smooth workflow from design and programming to fabric spreading, labeling, cutting and pick-up of cut parts. At CISMA 2019 Shima Cutting Solutions will be demonstrated through a comprehensive display of the company's CAD/CAM lineup consisting of the SDS-ONE APEX4 design system, P-SPR2K fabric spreading machine with labeling option, P-CAM161 multi-ply computerized cutting machine, and pick-up table with pick-up projector.

SDS-ONE APEX4 is a brand new design system shown for the first time in China. Fabric simulation capability in circular knitting, flat knitting, weaving, pile weaving and printing reduces sampling time, cost and material. New PGM software features improved interface and up to a 40 per cent increase in productivity compared to the previous APEX3 system. Highly efficient Automarking Premium nesting software is available as well.

P-SPR2K computerized spreading machine provides smooth spreading and stacking of knits and other fabrics with stretch characteristics. The labeling option is available for affixing labels to each part for smooth pick-up.

P-CAM161 offers high-quality, efficiency and productivity with good cost-performance. It is designed to handle precision cutting of a variety of fabrics and materials for flexible high-volume production. The pick-up table features a pick-up projector that projects images of cut parts onto the fabric to increase efficiency and prevent human error in pick-up and sorting.

Also shown at the JUKI booth (Hall W3, Stand D02) will be the prototype P-CAM160 single-ply computerized cutting machine that will be demonstrating automatic pick-up and workflow to sewing machine as an example of the "Connected Industries" Industry 4.0 proposal by the Japanese government.

All SHIMA SEIKI products are developed and manufactured with innovative technology, precision engineering and Made-in-Japan quality.

Exhibit Details

Exhibition:	CISMA2019	
Date:	Wednesday, 25th ~ Saturday, 28th September, 2019	
Hours:	9:00AM - 4:30PM (Final day 9:00AM - 1:00PM)	
Location:	Shanghai New International Expo Centre (SNIEC) 2345 Longyang Road, Pudong New Area Shanghai, China Tel: +86-21-28906888	
Organizer:	China Sewing Machinery Association Tel: +86-10-65211282	
Booth No.:	Hall E2, Stand F12	
Exhibit:	P-CAM161	Computerized cutting machine/NC cutting machine
	P-SPR2K	Spreading machine with labeling option
	SDS-ONE APEX4	3D design system (NEW)

P-CAM160 Computerized cutting machine (prototype)
(on display at the JUKI booth: Hall W3, Stand D02)
